- **Pharmacies**
- **Cloud kitchens**
- **Small & growing**

Bill faster.
Manage smarter.
Grow better.

- Offline-first
- Integrated payments
- Multilingual
- Multi-branch

ONE PLATFORM FOR RETAIL & HOSPITALITY

Five things ONPOS does better.

ONPOS is a next-generation point of sale platform for businesses that need more than billing. Selling, online ordering, kitchen, inventory, loyalty and back office run on one platform — **offline-first, multi-branch and multilingual**.

01

OFFLINE-FIRST POS

Keep selling. Even when the internet goes down.

Transactions run directly on the device during outages. Background cloud sync brings products, prices, orders and devices back in line when connectivity returns.

02

SMART INVENTORY & MULTI-BRANCH

Complete stock control across every location.

Variants, barcodes, lot and serial numbers, expiry tracking and stock levels across every branch, with clear visibility into operations.

03

RESTAURANT & KITCHEN

From table to kitchen, seamlessly.

Reservations, floor plans, table service, kitchen display systems, live order tracking and course-based preparation keep front-of-house and kitchen connected.

04

INTEGRATED PAYMENTS & DELIVERY

Every way your customers pay.

Accept Visa, Mastercard, Apple Pay, Google Pay and local methods such as KNET and Mada through supported integrations. Connect leading delivery platforms including Deliveroo, Talabat, Careem and more.

05

UNIFIED MANAGEMENT & ANALYTICS

Your entire business. One powerful platform.

Sales, inventory, loyalty, cash control, staff, accounting, CRM and reporting in one place, across stores, brands and channels.

PLANS

Start small. Scale up.

Let's talk — custom quote
